NMVTIS Consumer Access Product Disclaimer

The National Motor Vehicle Title Information System (NMVTIS) is an electronic system that contains information on certain automobiles titled in the United States. NMVTIS is intended to serve as a reliable source of title and [brand](#) history for automobiles, but it does not contain detailed information regarding a vehicle's repair history.

All states, insurance companies, and junk and salvage yards are required by federal law to regularly report information to NMVTIS. However, NMVTIS does not contain information on all motor vehicles in the United States because [some states](#) are not yet providing their vehicle data to the system. Currently, the data provided to NMVTIS by states is [provided](#) in a variety of time frames; while some states report and update NMVTIS data in "real-time" (as title transactions occur), other states send updates less frequently, such as once every 24 hours or within a period of days.

Information on previous, significant vehicle damage may not be included in the system if the vehicle was never determined by an insurance company (or other appropriate entity) to be a "total loss" or branded by a state titling agency. Conversely, an insurance carrier may be required to report a "total loss" even if the vehicle's titling-state has not determined the vehicle to be "salvage" or "junk."

A vehicle history report is NOT a substitute for an independent vehicle inspection. Before making a decision to purchase a vehicle, consumers are **strongly encouraged to also obtain an independent vehicle inspection** to ensure the vehicle does not have hidden damage. The [Approved NMVTIS Data Providers](#) (look for the NMVTIS logo) can include vehicle condition data from [sources](#) other than NMVTIS.

NMVTIS data **INCLUDES** (as available by those entities required to report to the System):

- Information from [participating](#) state motor vehicle titling agencies.
- Information on automobiles, buses, trucks, motorcycles, recreational vehicles, motor homes, and truck tractors. NMVTIS may not currently include commercial vehicles if those vehicles are not included in a state's primary database for title records (in some states, those vehicles are managed by a separate state agency), although these records may be added at a later time.
- Information on "brands" applied to vehicles provided by participating state motor vehicle titling agencies. Brand types and definitions vary by state, but may provide useful information about the condition or prior use of the vehicle.
- Most recent odometer reading in the state's title record.
- Information from insurance companies, and auto recyclers, including junk and salvage yards, that is required by law to be reported to the system, beginning March 31, 2009. This information will include if the vehicle was determined to be a "total loss" by an insurance carrier.
- Information from junk and salvage yards receiving a "cash for clunker" vehicle traded-in under the Consumer Assistance to Recycle and Save Act of 2009 (CARS) Program.

Consumers are advised to visit vehiclehistory.bja.ojp.gov for details on how to interpret the information in the system and understand the meaning of various labels applied to vehicles by the participating state motor vehicle titling agencies.

MotoVerifyProducts Consumer Access Product Disclaimer

This report, and any reliance upon it, is subject to [MotoVerifyTerms Of Service](#). If you obtained the report from a dealer, lender, or other company, the company has been provided with these Terms and Conditions and can share them with you.

A vehicle history report is NOT a substitute for an independent vehicle inspection. Before making a decision to purchase a vehicle, consumers are strongly encouraged to also obtain an independent vehicle inspection to ensure the vehicle does not have hidden damage.

Glossary

Information to help you better understand information provided to you in the MotoVerifyHistory report. Please see the report sections page, FAQ, terms of service and disclaimer for more information.

MOTOVERIFY

CHECKS

Values - Black Book

Retail Value (Black Book):

The listing price a dealer would ask for a vehicle available for sale, determined by compiling dealer asking prices.

Vehicle Value:

Monetary vehicle values as calculated by third party companies.

Trade-in Value (Black Book):

The price a dealer would offer a consumer for their vehicle to apply toward the purchase of another car in the dealer's inventory.

Average Condition (Black Book):

The vehicle is solid with substantial serviceable life remaining, but normal interior and exterior wear is allowable. Any previous paint repair must only be apparent to the trained eye. There could be minor mechanical, or maintenance work required. Tires should be in average condition or better and there should be typical miles for the model year.

Rough Condition (Black Book):

The interior and exterior will show more than normal and expected wear and tear. The vehicle could have excessive miles for the model year and may be approaching the end of its serviceable life. The vehicle could have had previous body damage with possible sub-par repairs. There could be cracked glass. The interior could be torn, stained and have adverse odors. There could be physical or mechanical repairs needed. Tires could be worn and/or mismatched. A negative vehicle history with title brand like salvage, frame damage or mileage discrepancy would push the condition to below Rough condition.

General Terms

Title:

Official state DMV document that indentifies the vehicle, any lienholder and owner. Rules governing issuance are specific to each state.

Junk or Salvage event (from NMVTIS):

Vehicle was seen at a junk yard, wrecker, dismantler or crusher, or seen at a salvage yard or salvage auction. These vehicles can range from inoperable to fully driveable with little or no actual damage.

Odometer Reading:

Distance (in miles or kilometers) that the vehicle has traveled. Over time, the mileage reported should increase. Many vehicles are driven 10,000-15,000 miles a year; others more or less.

Event Date or Date Applied:

Date the event was reported to have occurred.
